READING COMPREHENSION

[each answer worth 2 points]

Read texts A–E and answer the ten questions below. For each answer, choose one of the sections in the article, A–E. Mark your answers on the separate answer sheet.

A

In early 2004, the rock group Franz Ferdinand got their first big break when their second single 'Take Me Out' reached the British Top 10. A year later, they were collecting awards for the best rock act and the best British band, having gained both critical and popular acclaim for their debut album, and set up their own website. Indeed, Franz Ferdinand and their management attributed their success to more than sharp haircuts, natty outfits and the songs themselves. They believe that while their success was in part due to the tried-and-tested marketing techniques that make a new band – touring the music venues, relying on the build-on of business by word-of-mouth and convincing radio stations to play their stuff – it was also due in no small part to the internet.

B

Ever since the Web became a mass-market phenomenon in the late 1990s, record labels had largely been using it as just another marketing tool. For their biggest acts, they would build hugely expensive sites that acted as little more than moving billboards, leaving everything else to fan sites. Franz Ferdinand were different. They were amongst a new wave of popular bands who used the medium to bridge the gap between themselves and their fans. Groups like Radiohead started the trend, allowing internet users to watch them in the studio and share their innermost thoughts via online diaries. Franz Ferdinand took things a step further. They regularly appeared on their own message boards, chatting indiscriminately to fans and posting diary entries and photos from wherever they were in the world, using their own digital cameras, microphones and laptops. All four group members had access to the site's content-management system, making it easy for them to update it themselves.

C

The diary entries from lead singer Alex Kapranos, by turns amusing and insightful, were written on the road, giving them the quality of a freewheeling blog. Detailing a trip to France, for example: 'We played the amphitheatre in Lyon with PJ Harvey tonight. I split my trousers on stage, but it turned out not to be quite as tragic as it could have been,' he wrote, before going on to explain how a quick change and an extra-long intro to the first song saved his blushes. This 'do-it-yourself' ethic is something that set the new breed of net-aware bands apart from their predecessors, according to Chris Hassell, new media director of DS Emotion, the company behind the site, who explains that what previously 'would have been seen as a bit geeky' was suddenly cool.

D

Hassell, who co-founded DS Emotion, the Leeds-based web design agency, says the band were heavily involved from the beginning. It was bass player Bob Hardy who noticed the work that the agency had done for another band and asked them to get involved. 'They had a very clear idea what the site should be like,' Hassell says, adding that they wanted the look that they had used on their sleeve designs and videos to be reflected in the site. As Alex Kapranos remembers: 'We were delighted with it. We gave them an aesthetic outline and they brought it to life. It was really easy to maintain. Bob was in charge of images and I wrote in the regular diary. I didn't always have access to a PC, but I tried to update it whenever I could.'

E

It wasn't long before the team behind the website was joined by a full-time news editor who regularly talked to all four members of the band, their management and their record label Domino to share ideas. 'We knew we couldn't compete with the fan sites in terms of the sheer amount of information on the band. They were doing that job very well. So we concentrated on things they couldn't do,' Hassell says that the online shop integrated into the site, for example, allowed the band to release material that would otherwise go unheard. By the time the band geared up to record its second album, DS Emotion was also working on a thorough overhaul of the website.

Which section mentions the following?

- 21.** the difficulty a band member had in making regular contributions to the site
- 22.** a band member seeing the potential in a professional relationship
- 23.** the shortcomings of some websites featuring other bands
- 24.** the role of the band's outward appearance in gaining them popularity
- 25.** the pioneers in a new approach to rock band websites
- 26.** website entries being both thoughtful and entertaining
- 27.** a change in the general perception of acceptable website content
- 28.** the website giving users exclusive access to certain tracks
- 29.** positive reviews of the band's musical output
- 30.** the website fitting in with the band's established image
