We recommend the following procedure for setting up the betting boxes:

Establishment of the betting committee

- Neither the organisation of strike preparation nor the establishment of a strike committee is regulated by any legal regulation. It is therefore up to the will and decisions of those who wish to exercise their constitutional right to strike as to how they proceed.
- If the employer has a basic trade union, we recommend that a membership meeting be called with the possible participation of all employees (not just union members) to discuss the involvement of the college (part of the college) in the strike.
- If the employer does not have a trade union, the initiator of the strike shall call a meeting of all employees to discuss participation in the strike.
- At this meeting appoint a strike committee. The number of its members and its competences are not regulated in any way, it depends on the decision of the collective of employees. Where there is a trade union, it is advisable that the VOS ZO committee performs this function. It is not excluded that a contact person is appointed instead of a strike committee. Where there is a trade union, it is practical for the chairman of the VOS ZO to be this person.
- The stewardship committee or the contact person is to act as an informational point of contact to the collective of employees and the employer, to convene employee assemblies as needed, to be in contact with the employer and to provide other necessary operational tasks.
- Failure to appoint a strike committee or contact person does not mean that employees cannot participate in any strike. However, there is a risk of potential disputes with the employer.

The VOS management will continuously send information on the results to the state committees.

negotiations. For **this reason** we ask you to send us the following information:

- name and address of the school, part of the university
- name of contact person and email address
